

STRENGTHEN.
ADAPT.
ENVISION.

SEAWALL PROGRAM FRAMEWORK

THE SEAWALL PROGRAM, led by the Port in coordination with the City, will provide the Port and the City with the tools to address current and future risks over time. There are three elements to the Program – **Strengthen, Adapt** and **Envision** – which allow the Port to respond to risks and conditions in a way that is transparent and accountable.

1

STRENGTHEN ELEMENT

STRENGTHEN
THE SEAWALL FOR
PUBLIC SAFETY

Objective:

Immediately implement highest priority Disaster Response and Life Safety Projects along the Embarcadero Seawall.

Planning and Implementation

Horizon:
2018-2026

Priorities:

Current Seismic & Flood Risk

Geographic Focus:

Embarcadero Seawall

2

ADAPT ELEMENT

ADAPT TO
MID-CENTURY
RISKS

Objective:

Identify policies and projects that will result in a Port that is resilient to seismic and increasing flood risks and that can respond to changing priorities. Projects will be integrated into city, regional and private actions, resulting in coordinated implementation to increase waterfront resilience.

Planning and Implementation Horizon:

2020-2050, Plan updated every five years

Priorities:

Seismic Risk and Future Flood Risk

Geographic Focus:

Entire Port Jurisdiction

3

ENVISION ELEMENT

ENVISION
THE WATERFRONT
IN 2100

Objective:

Develop visions that can respond to remaining seismic risk and increasing flood risks and have an ongoing public conversation about the trade-offs of different options.

Planning and Implementation Horizon:

2050-2100, Vision Element updated every 10 years

Priorities:

Seismic Risk and Future Flood Risk

Geographic Focus:

Entire Port Jurisdiction

ELEMENTS

STRENGTHEN
THE SEAWALL
FOR
PUBLIC SAFETY

ADAPT
TO
MID-CENTURY
RISKS

ENVISION
THE
WATERFRONT
IN 2100

SEA LEVEL RISE

SEISMIC

PROGRAM DEVELOPMENT
